

## ready to get Genii™ Ostomy Seals added to your prescription?

Our flat and convex seals are part of a complete range of Genii™ skincare solutions available on prescription and stocked by all dispensing suppliers and ostomy delivery companies. Your Trio Advisor will keep in contact to help with anything you need.

Your stoma may change shape and size but our seals will flex and move with your stoma. Simply choose the best size for you by selecting your stoma size and choosing small, medium or large.

### Need extra security?

You may have a hernia, do a lot of physical activity or want peace of mind at night. Genii™ Flange Extenders are designed to go around the flange to provide a soft, flexible, invisible border which conforms to your body shape to provide extra security. Get in touch today if you'd like more information or to order your free sample

## why is Sil2 Breathable Silicone Technology® great for skin?

Sil2 Breathable Silicone Technology® is a unique silicone adhesive blend that feels and breathes just like normal skin. It sticks brilliantly but doesn't absorb moisture. So, it won't swell, go mushy, create a goopy mess, or cause pain when you remove it. Which means you can wear it for longer without worrying about leaks.

# the first silicone ostomy seal that provides a perfect fit.

Genii™ Ostomy Seals are available in flat and convex to suit all stoma types

**Snug, customised fit**  
Hugs the stoma, eliminating gaps and leaks

**Comfortable and secure**  
Responds to body movement

**Quick and easy to apply**  
Simply stretch around the stoma without warming or shaping

**Protects delicate skin around your stoma**  
Protection from stool and urine, allowing it to heal naturally and remain healthy

**Longer wear time**  
Unique Sil2 Breathable Silicone Technology® doesn't absorb bodily fluids so it won't go goopy, mushy or breakdown

### ALSO AVAILABLE

**Genii™ Convex Ostomy Seals**  
Ideal for flat or inverted stomas or uneven skin.

## how to use a Genii™ Ostomy Seal

1. Clean the area around the stoma, it's important to make sure the skin is dry as **the seal won't stick to wet skin.**
2. Using your thumb and forefinger, carefully pull the seal from its pack. It's normal for the seal to be fixed to the blister pack, but it's strong enough for you to pull and stretch it free without damage.
3. Take the edge of the seal in both hands and stretch it around the stoma. You can then allow the seal to retract around the stoma to form a comfortable seal.
4. The Genii™ Ostomy Seal stretches to fit around the stoma. So there's no need to mould it into shape. Its gentle elasticity will hug the stoma to form the seal.
5. Once it has sealed around the stoma, gently press the Genii™ Ostomy Seal onto your skin. Place the ostomy bag directly onto the seal as normal and hold it in place until it feels secure.

3. Take the edge of the seal in both hands and stretch it around the stoma. You can then allow the seal to retract around the stoma to form a comfortable seal.

Convex seals are versatile and can be applied in two ways, either convex side up or convex side down, so that gentle pressure can be applied directly around your stoma to create a secure fit, whichever works best for you.
